# Daniel Cantor

Full-Stack Developer (React / Next.js / TypeScript)

Bogotá, Colombia (open to remote) · daniellgatico@gmail.com · +57 319 3403607
github.com/DanielCantor667 · linkedin.com/in/danielcantorayala

## Summary

Full-stack developer who designs, builds, and operates complete web applications end to end: data model, backend, frontend, and production deployment. Since 2025 I have shipped and maintained four production platforms of my own — a B2B e-commerce with an integrated ERP/HR module, a multi-role marketplace, a brand storefront with an AI shopping assistant, and a management platform for a music academy — each with online payments, role-based admin panels, and automated workflows powered by WhatsApp and AI. Core stack: TypeScript, React, Next.js, and PostgreSQL.

## Skills

**Languages:** TypeScript, JavaScript, PHP, Python, SQL

**Frontend:** React, Next.js (App Router), Tailwind CSS, Framer Motion / GSAP

**Backend:** Node.js, Server Actions, REST APIs, streaming (SSE), MVC (PHP)

**Database:** PostgreSQL, Prisma ORM, MySQL, relational schema design

**Integrations:** payment gateways (Wompi, Bold), AI (OpenAI, AI SDK), CRM (Kommo), ERP (Odoo), WhatsApp

**Tools:** Git, GitHub, Vercel, Supabase, Playwright

**Languages spoken:** Spanish (native), English (B2 — upper-intermediate)

## Experience

**Full-Stack Developer — Personal Projects** 2025 – present

- Design, build, and operate four production web applications end to end (kliniu, drokex, l-origine, 4ustudio): architecture, data model, backend, frontend, testing, and deployment. Technical detail below under Projects.

**Software Development Intern — Agrocinco** Bogotá, Colombia · Jan 2025 – Dec 2025

- Built an internal web application for order and inventory management (MVC architecture, PHP, MySQL) that replaced a manual spreadsheet-based process.
- Automated PDF and Excel document ingestion into the inventory system, removing manual data entry for the team.
- Added data validation across upload flows, reducing inventory errors flagged by the operations team.

## Projects

**kliniu — B2B e-commerce + ERP/HR**

Next.js · Prisma · PostgreSQL · Supabase · Wompi

- Built the full e-commerce flow (catalog, cart, checkout, Wompi payment gateway, loyalty points system) and the admin panel with role/permission management, quotes, and marketing campaigns.
- Modeled and implemented a full internal ERP/HR module (payroll, attendance, treasury, accounting) across 25+ Prisma tables, used daily by the company's operations team.
- Integrated the business's CRM (Kommo) and ERP (Odoo) and automated sales follow-ups over WhatsApp.

**drokex — e-commerce and marketplace**

Next.js · Prisma/PostgreSQL · OpenAI · Three.js/Spline

- Designed a three-role marketplace (customer, provider, admin) including a provider portal with paid plans, a directory, and a per-provider landing page.
- Implemented real-time product quoting via streaming (SSE) and an AI-powered chat assistant embedded in the catalog.
- Built interactive 3D experiences (Three.js, Spline) and a Latin America coverage map to differentiate the brand from competitors.

**l-origine — brand e-commerce**

Next.js · AI SDK · Tailwind · Bold

- Built the online store with a fully integrated checkout and payment gateway (Bold).
- Developed a conversational AI assistant that guides customers through product choices on-site.
- Implemented a custom-auth admin panel for content, catalog, and order management, with automated WhatsApp notifications on every confirmed sale.

**4ustudio — music academy platform**

Next.js · Supabase · Bold

- Built the class scheduling and booking system with instructor availability and monthly quota control.
- Developed the student portal (login, class history, account) and a retention/reactivation CRM with automated workflows to win back inactive students.
- Integrated payments (Bold), PDF contract generation with digital signature, and an AI-based course recommendation engine.

## Education

Corporación Universitaria Minuto de Dios, Software Engineering — Jan 2026 – present

Uniagustiniana, Software Development Technology — Jan 2023 – Dec 2025
